

The Need for Test Cards Issued from Production Infrastructures

Tony Cieri for
Mike Butler/GSA

Why?

- Life Cycle Phase is moving from predominately “Issuance” to “Use”
- In PACS
- In Network Access
- In Applications

The Need

- Vendor community need to develop and internally test products/applications using the attributes of PIV to serve customer base

The Challenge

- 20+ different issuance infrastructures across Fed enterprise
- Card Provisioning at the 1 foot level
- Not real PIV but enough to develop and test
- How to provision for biometrics on test card

Summary

- Stay Tuned,,,,,More to follow in the future
